

Dear Sirs, It has been brought to my attention that the way I listen to KLOVE Radio may be affected in the near future. That concerns me greatly. I live in a very rural state that could not warrant a traditional station for KLOVE, they MUST use the FM translators method as a way to bring their station to me.

KLOVE ministers to our Sioux Falls community by offering safe, family-friendly music and commentary AND most importantly, they do it commercial free!

If KLOVE were to lose their translator capability, I believe it affect our local community in a negative way. I don't know how many people truly listen to KLOVE around here, but I know I see a lot of bumper stickers from their station! Need I say anymore?

Truly it is in the better interest of the public if KLOVE is allowed to continue delivering their positive, encouraging message, COMMERCIAL FREE via the translator system.

Thank you for consideration of my concerned opinion.
